

Shahil

Quality Assurance Engineer | Manual & Automation Testing
Ranchi, Jharkhand, India | 6909688773 | sm6720781@gmail.com | LinkedIn | GitHub

PROFESSIONAL SUMMARY

QA Engineer with hands-on manual and automation testing experience across functional, regression, integration, and API testing on data-driven applications. Skilled in test case design, validating application behavior and business logic, and using SQL for data validation. Comfortable in Agile/Scrum teams following structured STLC-based processes, with a track record of thorough defect identification, tracking, and retesting through to closure. Practical automation exposure with Selenium WebDriver and TestNG, and API testing via Postman.

TECHNICAL SKILLS

- Manual Testing: Test Case & Scenario Design, Test Plan & Strategy, Functional, Regression, Integration, Smoke, Sanity, Usability, and Exploratory Testing, Business Rule Validation, Defect Identification, Bug Life Cycle, Bug Tracking & Reporting, Retesting
- Automation Testing: Selenium WebDriver, Playwright, Java, Python, TestNG, JUnit, PyTest, Page Object Model (POM)
- API & Data Validation: Postman, REST API, HTTP Methods, Status Codes, API Validation, SQL, MySQL, Database & Data Accuracy Testing
- Tools & Technologies: Jira, Git, GitHub, Jenkins (CI/CD), VS Code, HTML, CSS, JavaScript
- Testing Concepts: STLC, SDLC, Agile/Scrum, Defect Life Cycle

EXPERIENCE

Web Development & QA Intern — AIYCSM, Dimapur

Jul 2025 – Aug 2025

- Reduced pre-deployment functional issues by ~20% by identifying and documenting 25+ defects through structured functional testing, bug tracking, and retesting workflows
- Improved release stability across 6 deployment cycles by validating website functionality and business behavior on WordPress and Firebase, coordinating fixes with the development team before each release
- Maintained version control integrity across 50+ commits by managing code changes in Git/GitHub throughout the development and testing cycle

QA PROJECTS

AI-Based Food Quality Detection System — Usha Martin University

Jan 2026 – Jun 2026

- Designed and executed a test plan and test strategy across 30+ test scenarios, validating prediction accuracy and business logic through functional, regression, and usability testing
- Minimized defect recurrence by ~15% by building a structured bug life cycle process — identifying, documenting, tracking, and retesting defects using a dedicated bug tracking tool
- Strengthened system output reliability by validating data and results across 20+ edge-case and standard input scenarios

Fake News Detection System — Usha Martin University

Feb 2025 – Jun 2025

- Verified API integration correctness and data consistency by testing news content validation endpoints, confirming accurate status codes and response handling
- Increased test coverage by structuring 25+ functional test scenarios for text analysis and news verification modules, aligned to SDLC-based development
- Cut down output inconsistencies by ~20% through retesting resolved defects, confirming fixes across repeated test cycles

CERTIFICATIONS

- NPTEL – Cloud Computing and Distributed Systems, IIT Kharagpur — Elite, Top 5% of 33,252 participants (2026)
- Web Development Internship Certificate — AIYCSM (2025): 2-month internship covering web development, website testing, debugging, WordPress, Firebase, GitHub, and VS Code

EDUCATION

Bachelor of Technology — Computer Science & Engineering

2026

Usha Martin University, Ranchi | CGPA: 8.7

Intermediate (12th)

2022

B.H.S.S, Dimapur | 60%

Matriculation (10th)

2020

Bronson School, Dimapur | 57%
